RESEARCH FOCUS & METHODS

Computational neuroscientist with integrated bioinformatics and wet-lab expertise in single-cell RNA-seq, transcriptomic analysis, multi-omics integration, and cross-species comparison. Ph.D. research focuses on glial lipid dysregulation in A β -tau co-pathology in Alzheimer's disease. Experience spans end-to-end transcriptomic workflows, Alzheimer's disease mouse models, and molecular/cellular biology techniques.

EDUCATION

Ph.D. in Neuroscience – Indiana University, Bloomington, IN	Aug 2022 – May 2026
- Advisors: Hui-Chen Lu and Jungsu Kim - Dissertation: <i>Decoding Aβ and Tau Co-Pathology in Alzheimer's Disease Mouse Models at Single-Cell Resolution</i>	
M.S., Kinesiology – Indiana University, Bloomington, IN	Aug 2020 – May 2022
- Advisor: Hannah J. Block - Thesis: <i>Specificity of Transcranial Magnetic Stimulation Effects on M1 and S1</i>	
Juris Doctor – Ewha Law School, Seoul, South Korea	Mar 2009 – Feb 2012
Bachelor of Law – Korea University, Seoul, South Korea	Mar 2004 – Feb 2009

LICENSURE & AFFILIATIONS

Patent Attorney , Korea Patent Attorneys Association	Feb 2015
Attorney-at-law , Korean Bar Association	May 2012

RESEARCH EXPERIENCE

Graduate Research Assistant – Indiana University, Indianapolis & Bloomington, IN Kim Lab (IU School of Medicine), Lu Lab (IU Bloomington)	Aug 2022 – Present
- Led experimental and computational transcriptomic studies of amyloid, tau, and combined pathology mouse models to identify cell-type-specific programs associated with Aβ-tau interaction and glial lipid dysregulation. - Conducted R/Python-based analyses of large-scale transcriptomic datasets, including cross-species alignment with human Alzheimer's disease signatures. - Developed and applied a targeted RNA-seq panel focused on lipid metabolism and immune pathways, enabling pathway-level resolution beyond whole-transcriptome approaches - Supported large-scale multiomic analyses integrating snRNA-seq and snATAC-seq in Aβ amyloidosis models. - Contributed to developing semi-automated single cell annotation pipelines, establishing reproducible analysis practices for RNA-seq datasets, and benchmarking nuclei isolation methods. - Generated publication-quality visualizations and manuscript-ready analyses to communicate biologically meaningful insights from high-dimensional omics data across experimental and computational collaborators.	
Graduate Research Assistant – Indiana University, Bloomington, IN Sensorimotor Neurophysiology Laboratory	Aug 2020 – May 2022
Conducted human neuromodulation (TMS) studies and analyzed behavioral and physiological outcomes	
Volunteer Research Assistant – Indiana University, Bloomington, IN Lai Laboratory – Trained in BAC recombination (Bacterial Artificial Chromosome engineering) Newman Memory Laboratory – Assisted with rat handling and optogenetic apparatus setup	Sep 2021 – Jul 2022 Nov 2019 – May 2020

TECHNICAL SKILLS

Mouse AD models | sc/snRNA-seq | Transcriptomics, Multiomics | Cross-species alignment | R, Python | HPC | GitHub

HONORS & AWARDS

Three Minute Thesis (3MT) Competition Finalist – Indiana University	2026
AGE Early Career Scholar Honorable Mention – American Aging Association	2025
Gill Fellowship – Gill Center for Biomolecular Science, Indiana University	2023
Travel Awards – Program of Neuroscience, Indiana University	2022, 2024, 2025
Research Award – Graduate and Professional Student Government, Indiana University	2022

- Updyke/President's Challenge Fellowship – Indiana University 2021
- Sports Merit Medal – President of the Republic of Korea 2019
- Best Employee of the Year – PyeongChang Organizing Committee for the 2018 Olympic & Paralympic Winter Games 2016

POSTERS & PRESENTATIONS (First Author)

- *Unique transcriptomic alterations in combined amyloid and tau mouse models aligned with human Alzheimer's disease* – Indiana University Program of Neuroscience Poster Session, Bloomington, IN Jun 2025
- *Restoring the statistical power failure and rigor of research using amyloid- β amyloidosis mouse models for Alzheimer's disease* – Society for Neuroscience, Washington, DC Nov 2023
- *Restoring the statistical power failure and rigor of research using amyloid- β amyloidosis mouse models for Alzheimer's disease* – Big Ten Neuroscience Annual Meeting, Indianapolis, IN Jun 2023
- *Specificity of TMS effects on the primary motor and sensory cortices* – Greater Indiana Chapter Society for Neuroscience Annual Meeting, Bloomington, IN Apr 2022

SERVICE & TEACHING

Early Career Policy Ambassador: Society for Neuroscience 2026

Reviewer: Molecular Neurodegeneration (2023), American Aging Association Early Career Scholar's Award (2025)

Guest Lecturer:

- Stark Medical Neuroscience Undergraduate Summer Research Program, Indiana University 2023 – 2024
- The Science Behind Brain Development and Function (Y488/P657), Indiana University 2023
- Annual Education Program for Government Officials, Korea Ministry of Government Legislation 2015 – 2017

Teaching Assistant: Advanced Techniques in Molecular Neuroscience Course, Cold Spring Harbor Laboratory 2022

WORKSHOPS

- Computational Techniques and Resources for Effective Translational Research in Alzheimer's Disease – The Jackson Laboratory May 2025
- Molecular Biology Summer Workshops – New England Biolabs Jul 2023
- Human Pluripotent Stem Cell Culture Workshop – STEMCELL Technologies Oct 2023

EARLIER PROFESSIONAL EXPERIENCE (LAW & GOVERNMENT)

Attorney-at-Law & Patent Attorney (South Korea) 2012–2018

- PyeongChang 2018 Organizing Committee: Legal Counsel (2014–2018); Director, Legal Affairs (2018)

- Embassy of Korea in Wellington, New Zealand: Research Officer (2013–2014)
- KY Law firm: Attorney-at-Law (2012–2013)
